

# Assignment: Review, Timed Practice End-of-course Exam Part A

## Introduction

All students will be provided materials that mimic the Part A section of the AP Exam, including general directions and provided materials. Students will address the three required questions in demonstration of argument analysis and evaluation--foundational skills of AP Seminar.

For the sake of timing, students may be provided the materials in physical form so that they may analyze and annotate during the allotted time to answer the questions.

Students engage the text by identifying features of the argument and may choose to utilize argument mapping techniques to help formulate their written response. College Board suggests that Part A of the AP Seminar Exam takes around 30 minutes.
